MESSAGE FROM OUR CHAIRMAN

“We, Al Khaleej Ceramics, follow our corporate slogan “Beauty and Endurance”.

We pursue our business activities with our core strengths of professionalism and strive to deliver maximum satisfaction to you. Our Business is Tiles Production. Our strength is the Quality of our Product.

Our motivation is our pride in our organization and what it has accomplished throughout the years. Integrity is our foundation; quality and fairness are our goals and caring for our customers is our core objective.

Commitment to excellence and client satisfaction form the basis of our philosophy. Our theme is quality, integrity, time, efficiency and reliability.

Our corporate responsibilities include enhancing our awareness, conformity with business ethics and aim to be a reliable and trustworthy company globally. We believe that only outstanding workmanship, superior quality control, strengthening reliability and continuous development of our management profile and professionalism can bring out the desired results and our goal of customer satisfaction.

I wish the forthcoming years flourish your business. I do hope that we will join hands to take the success forward. You are always welcome to be in touch with me directly in the below email address on any of your suggestions and concerns.”

With Best Wishes and Regards
Eng. Mohamad Al Shihabi
Email: secretary@granmitto.com
ABOUT US

Al Khaleej Ceramics Co. LLC, GRANNITTO, is one of the pioneers in manufacturing porcelain tiles in the GCC. Commenced Operation in 1994 Al Khaleej Ceramics, GRANNITTO, has gained high goodwill in the Building Material & Construction Industry not only in the UAE, but also worldwide. Al Khaleej Ceramics Co. LLC is specialized in manufacturing and distributing high quality porcelain tiles. We strive to produce tiles with distinctive quality and convey high-class customer services with the utmost professionalism.

We are located in Dubai Industrial City with the most modern manufacturing unit. The Brand Grannitto is known as the name of trust both in Domestic and International Market. It is one of the fastest growing names in the modern tile industry. We pace to keep up with the customer and market demands which makes us favorite both domestically and internationally.

Al Khaleej Ceramics Co. LLC has built a reputation for delivering high-end products. This was made by the implementation of a systematic and comprehensive Quality Management System compatible with global standards. Each employee ensures compliance and adherence to stringent quality policies. The products go through high-quality checks. We set high standards of relationship with our customers, suppliers, distributors and resource partners. You may see our extensive product mix in this catalogue, but not limited. New developments time to time will be updated in our website www.alkhaleejceramics.com in regular intervals.

TILE CALCULATION

When taking on any tiling project it is important to first calculate how many tiles you’re going to need to complete the job. Whether it’s for walls or floors, large or small spaces. It is a quick and easy way to determine the cost and help you stay within your budget. A few hints and tips on how to do this.

Before You Start

You should have a clear idea of the size and shape of the area you want to tile and how it’s going to be used. It’s helpful to first draw your area on paper, for example, two walls and one floor. Then, determine if the tiles are to cover the whole area or part of the area and mark the area to be covered.

Make sure you settle on a tiling pattern early like straight, pinwheel or herringbone, and your grout width. Remember to take out the spaces for windows but add in any sills or skirting you plan to tile. Also, think about the fixed accessories you want to be incorporated within your tiling. Plus, you should always order an extra 10 to 15% because even if you don’t use them for the project, they may come in handy at a later date.

1. Take Area Measurements

If it’s a floor you’re tiling, use a measuring tape to measure the length of one side of the room and then the width of another side of the room. For walls, measure the length of the wall up and down and the width left to right.

2. Multiply Your Measurements

Multiply the length and width measurements you obtained, which will give you the total square meterage of the wall and/or floor areas. So, if the wall or floor measures 5m long by 4m wide, multiply 5 by 4 and your calculation will be 20 square meters. Do this for each wall or floor area you need tiled, and then add all of the numbers together.

So now you have the the square meterage, but it’s important to buy more tiles than you need to cover the space as you should factor in cuts, waste and breaks. The extra tiles will also help if your supplier runs out of stock mid-project. Multiply the square meterage you have by 15%, this will be the actual amount of square meterage you should buy tiles for.

3. Calculate The Coverage

Tiles usually come in boxes with their amount labeled, they divide the total square meterage required by the total square meterage of the tiles in the box. For example, if the room is 120 square meters and each box has 10 square meters of tile inside, then you’ll need 12 boxes.

Recommendation: Use spacers between tiles, we do not recommend zero joint fixing.

4. Work Out The Amount Of Tiles

Tiles are usually laid in straight lines so that grout lines end up like a grid. A great tip when buying your tiles is to make sure that they all have the same batch number. Different batches may have slight color variations that will show up in the finished product. You'll find the batch number on the packaging.

5. Get Tiling

Check out the full range of tiles available on our website at www.alkhaleejceramics.com

PATTERN

CREATING A PATTERN

If this is your first-time tiling, don’t be put off by some of the more involved patterns. Just give yourself plenty of time to layout the design carefully and you’ll find that these patterns are achievable.

- Straight (Stack Bond)
- Pinwheel
- Diagonal
- Windmill
- Herringbone
- Stretcher Bond

The most common and simplest tiling pattern. The tiles are laid in straight lines so that grout lines end up like a grid. A great tip when buying your tiles is to make sure that they all have the same batch number. Different batches may have slight color variations that will show up in the finished product. You'll find the batch number on the packaging.

Similar to the windmill, this design uses a small square tile surrounded by much larger square tiles to create the effect of a spinning pinwheel. Tiles in contrasting colors (TACO) should be chosen for the best effect.

Diagonal is similar to the straight pattern except the tiles are laid on a 45 degree angle, turning the tiles into diamonds. This style can be used with a border as a feature in a kitchen splashback or for an entire floor to make a small room bigger. It’s perfect for the bathroom.

To create windmill pattern, four rectangular tiles are arranged around a square tile in the center. Using a square tile and grout in a contrasting color to the rectangles really make this pattern stand out. It can look busy on a floor but is good for a shower area or a border.

Perfect for hallways or outdoor paths, as the ‘V’ in the pattern acts like arrows pointing you in the right direction, the herringbone pattern is achieved by laying rectangular tiles in a zigzag pattern.

Stretcher bond uses square or rectangular tiles that are laid like bricks in a wall. The end of each tile is lined up with the center of the tiles that are both directly above and below it. This creates a staggered but cohesive look.
MAINTENANCE

The inherent technical characteristics of Tiles ensure that they will be relatively easy to maintain and should provide years of enjoyment. Most of the general purpose cleaning solutions that are available in the market can be used for cleaning the tiles, but it has to be ensured that it should be a non-oil, non-animal fat base. The cleaning components can leave behind an invisible residue, which can trap dirt. Hence, ensure that the tile is cleaned by a cleaning solution by thorough rinsing followed by wet vacuuming.

The General Cleaning steps can be summarized as follows:

- Remove all loose debris from the tile by sweeping with a soft bristle broom or vacuuming. Any accidental spill should be wiped up as quickly as possible.
- Apply the multi-purpose cleaner, in recommended dilution as per manufacturer of the cleaning solution.
- Allow the multi-purpose cleaner to remain on the tile for about 5 minutes.
- Wipe or mop with a non-abrasive mop or cloth.
- Remove the dirty cleaning solution and water with a wet vacuum or a mop.
- Allow the multi-purpose cleaner to remain on the tile for about 5 minutes.
- Rinse with water to remove residual cleaning solution on the tile.
- Remove the dirty cleaning solution and water with a wet vacuum or a mop.
- Allow the multi-purpose cleaner to remain on the tile for about 5 minutes.
- Rinse with water to remove residual cleaning solution on the tile.
- Remove the dirty cleaning solution and water with a wet vacuum or a mop.
- Allow the multi-purpose cleaner to remain on the tile for about 5 minutes.
- Rinse with water to remove residual cleaning solution on the tile.

It is absolutely essential that all detergent residues to be completely removed from the tile as any residual remains can dry on the tiles and form a coating, which can trap dirt and be very difficult to remove. The tile should be rinsed several times, if necessary, to remove all detergent residues.

The frequency and timing of any maintenance program are dependent on the specific characteristics of each tile application. Factors such as foot traffic, environmental conditions and product color should be considered when planning your maintenance schedule.

CERTIFICATIONS

This is to certify that:

Al Khaleej Ceramics Co LLC

Has Been Named:

Best Quality Porcelain Tile Manufacturer in UAE

CERTIFICATE

SCS Global Services does hereby certify that an independent assessment has been conducted on behalf of:

Al Khaleej Ceramics Co LLC

Dubai Industrial City, Park Sheikh, P.O. Box No. 52023, Dubai, United Arab Emirates

For the following product(s):

Porcelain:

Porcelain, Monoporosa Ceramic (Maximum Thickness: 15.0 mm)

The product(s) meet(s) all of the necessary qualifications to be certified for the following claim(s):

FloorScore®

Indoor Air Quality Certified to SCS-EC103-2014 v4.0

Conforms to the CEPIFI/Hub Standard Method v1.3.2017 (California Section 01350), effective April 1, 2017, for the school classroom and private office parameters when modeled as Flooring.

Measurement Concentration of Total Volatile Organic Compounds (TVOC): Less than equal to 0.5 mg/m³

Dichloromethane: Less than equal to 0.5 mg/m³

Greater than equal to 5.0 mg/m³

(in compliance with CEPIFI/Hub Standard Method v1.3.2017)

Registration #: SCS-FS-06685

Valid from: January 25, 2021 to January 31, 2022
